

NEW

ALP DESIGN

Tear-resistant and wear-resistant tubular PVC bag, specifically designed for the needs of scuba divers in collaboration with the CNSAS (National Alpine and Speleological Rescue Corps).

Double padded bottom with 4 water drainage holes, reinforced edge, shatterproof crossed webbing and handle.

Padded and adjustable shoulder straps with large stainless steel gear rings that facilitate the insertion of the connector.

Two rear handles for carrying it both horizontally and vertically.

Shoulder straps and handles attachment with internal anti-tear reinforcement.

Internal padding to protect the scuba tank and the rebreather, with the possibility of being removed to transform it into a classic tubular bag.

Drawstring closure with lanyard for vertical transport through barycentric suspension to the harness and upper flap with hole for the passage of the safety lanyard of the tank.

Transparent badge holder pocket to easily identify the contents of the bag or the name of the operator.

High quality product made in Italy!
